

**QUALITY & SAFETY STANDARDS COMMITTEE (QSSC) STRATEGIC PLANNING SESSION
23 NOVEMBER 2021 (TUESDAY), 0900 TO 1230 HRS (VIA ZOOM WEBINAR)**

ABOUT THE QSSC STRATEGIC PLANNING SESSION

The Quality and Safety Standards Committee (QSSC) organises a strategic planning session once every new 3-year term with the intent of seeking stakeholders’ inputs on the challenges and problem statements covering the area of workplace safety and health (WSH), sports safety, management systems and operational resilience, testing, inspection and certification. For this session, it also aims to address any impact and concern amid the Covid-19 pandemic, which may require adjustment to the new normal. It is hoped that through this interactive session and breakout group discussions, QSSC will be able to identify new potential standardisation areas to address new and emerging challenges faced, support national goals, promote industry WSH standards and practices, and enhance business resilience and sustainability.

At the same time, you will be able to hear from subject matter experts and prominent speakers on the key WSH trends and technologies, best industry practices, emerging technologies such as on Artificial intelligence and latest government initiatives.

We look forward to your active participation and valuable inputs to the session. The Committee is grateful for the opportunity to work together with industry partners as we strive towards fostering safe, healthy, and high quality workplaces for our workforce.
